# KIESEWETTER ORCHID GARDENS

Roslyn, N.Y.

1951 Catalogue

RALPH R. KIESEWETTER'S  
and JOSEPH W. URMSTON'S many  
years of experience as Orchid Hybridists go  
into the making of every seedling produced at  
Orchid Gardens and through these years they  
have expended every effort to guard and main-  
tain their policy of **QUALITY PRODUCTION**.

The very best stud plants available are used in  
each of these crosses and every one is guaran-  
teed to be as represented.

Wasted years of culture and anticipation,  
which end only in disappointment, can be  
avoided by the initial selection of reliable  
seedlings, which have been developed in the  
hands of experienced Hybridists.

You can select a Kiesewetter-Urmston seedling  
with confidence. **EXPERIENCE and FIDELITY**  
**OF PURPOSE** are **YOUR PROTECTION**.

outstanding hybrids

We hear talk about experimentation and the care exercised by Orchid Hybridists in making their crosses to develop increasingly better hybrids. "Once in a lifetime" after years of patient waiting — and wondering — their efforts are rewarded with the magnificent perfection of flowers like **Lc. Cuesta var. Sangue di Dio, C. Joyce Hannington, Lc. Joseph Hampton, Lc. Trail's End, Lc. Washington, Lc. Gertrude Hampton, Lc. Tokyo Rose.** This result is proof of the high standard of quality possible when the hybridists use the right combination of parents.

The above-mentioned **controllable hybrids** have proven to be some of the **finest crosses of all time.** They are outstanding in shape, texture, and lasting qualities. And further, one of the best things about these crosses is the fact that they come so extremely uniform. Wherever shown they prove their superiority. They have taken more awards in the past two years than any other comparable group. Three different plants among our **C. Joyce Hannington's** alone have received a **Gold Medal, First Class Certificate, and an Award of Merit**, respectively. A plant of our **Lc. Joseph Hampton** was awarded an **F. C. C.** The exhibit of our **controllable hybrids** at the **1951 International Flower Show** in New York was awarded a **Silver Medal.** Our exhibit at the **Boston Show in 1951** was awarded **three first prizes, the Honorary Vice-President's Trophy** for the best American-raised seedling, a **silver plate** for the best American-raised seedling flowering for the first time, and a **silver plate** for the best American-raised hybrid orchid.

Since **C. Joyce Hannington** has proven to be such a fine cross, we have made it again at Orchid Gardens. Seedlings of straight **C. Joyce Hannington** which have been in such demand will again be available in tubes and community pots. You will also find a listing of other crosses which have been made using one or another of these excellent examples as one of the parents.

# URMSTON PROVEN CONTROLLABLE CATTLEYA HYBRIDS

**Seedlings of These Crosses Available in Tubes Only**

These are immensely vigorous, free-flowering crosses, producing large dark flowers. The parents were carefully selected from a house of three thousand plants in bloom. The stud plants chosen were all developed from our fine *C. labiata*, and the resulting seedlings therefore contain one-half *C. labiata* blood. Their flowering period, in all cases, can be controlled to within three weeks, thus affording ideal stock for Christmas, Easter, Mother's Day, etc. production. The large, dark flowers provide welcome relief from the weaker-colored *Trianae* and *Mossiae* hybrids ordinarily available during winter and spring.

These crosses were originated from a strain of fine, strong-growing Cattleyas that are perfectly adapted to optimum cut-flower production. Our *C. amabilis*, for example, has produced up to seven flowers to the spike, with as many as twenty flowers to a six-inch pot. Perhaps the most remarkable and telling feature of these flowers is their dissimilarity to other flowers available during winter and spring. The predominance of *labiata*, *gigas* and *aurea* blood accounts for their all-around better quality, and increased saleability.

CROSS NUMBER	PARENTAGE	PRICE
JU 5	<i>C. Peetersii</i> , very fine dark variety X <i>C. amabilis</i> , very fine variety	\$35.00
JU 39	<i>C. Labi-Royal</i> X <i>C. Peetersii</i>	\$35.00
	Both parents were fine, dark, large-flowered varieties. The results should be outstanding.	
JU 42	<i>C. amabilis</i> } X      } <i>C. labiata</i> } C. Anne Claude	\$35.00

The *labiata* used here was the result of two generations of home-raised *labiatas*. This strain will undoubtedly provide us with the breeding stock for tomorrow. This cross should stand in a class by itself.

CROSS NUMBER	PARENTAGE	PRICE
JU 49	C. labiata X C. gigas	\$35.00
JU 55	C. labiata X Lc. Trail's End	\$35.00
JU 59	C. labiata X C. aurea	\$35.00
JU 68	Blc. Chief Joseph X C. labiata	\$35.00
JU 70	Lc. Joseph Hampton X C. labiata	\$35.00
JU 72	(Lc. Crowborough X Lc. Hilary, F.C.C.) X C. labiata	\$35.00

JU 81	C. labiata X Lc. Hilary, F.C.C.	\$35.00
JU 61	C. amabilis X (Lc. Crowborough X Lc. Hilary, F.C.C.)	\$35.00
JU 83	Lc. Braceyan X C. amabilis, var. Content	\$35.00

The following are yellow crosses. Their flowering period, summer and fall, can be reversed as with the previous group, providing spring flowers when yellows are normally practically non-existent. These crosses were all bred from fine varieties of Blc. Chief Joseph, which is unique among yellows. Of the many hundreds that we have flowered we have never had a deformed bloom. The color ranges from chartreuse through yellow and bronze. The flowers are large and the plants are considerably more vigorous than most yellows.

CROSS NUMBER	PARENTAGE	PRICE
JU 19	Blc. Chief Joseph X Bc. Durga	\$35.00
	We expect a fine large Brasso with sepals from cream to bronze and a large beautiful lip with plenty of gold.	
JU 20	Blc. Chief Joseph X C. aurea	\$35.00
	The C. aurea used here was the finest of a home-raised group. This should produce a well-balanced lot of strong-growing yellows.	
JU 30	Blc. Chief Joseph X Lc. Tokyo Rose	\$35.00
	Some beautiful color combinations are expected from this cross.	
JU 15	Blc. Chief Joseph X (C. Venus X Bc. Corrientes)	\$35.00
	Some very large flowers can be expected here — yellow through bronze.	
JU 18	Blc. Chief Joseph X Lc. Plymouth	\$35.00
	This is a very strong growing yellow, producing freely.

# GENERAL INFORMATION and SPECIAL INSTRUCTIONS

---

## SEEDLINGS IN TUBES

Seedlings in tubes will be shipped dry; that is, removed from the agar-agar and put back into the tubes dry. This prevents the stirring up of seedlings during shipment. Seedlings in tubes are never offered for sale until they are ready for transplanting into community pots. To avoid excessive losses, prepare your community pots in advance and plan to transplant seedlings immediately upon arrival.

CUSTOMERS WHO WISH TO GROW THEIR SEEDLINGS ON FOR A WHILE IN THE TUBES SHOULD PLAN TO PICK THEM UP HERE AT THE GREENHOUSE.

## ORDERING

Orders may be placed early to reserve your selections, but shipments will be made only when weather conditions permit safe delivery to your door. Orchid plants must be guarded against chilling since they may not recover from the set-back suffered thereby. The safe shipping period opens about April 15th and continues through October. If shipment is made to a cold area, plans should be made to pick up the parcel upon arrival so that it does not have to travel around in an unheated delivery truck.

When you place your order please mention a second choice if you have one, otherwise we will notify you that we cannot fill your order. NO SUBSTITUTIONS WILL BE MADE WITHOUT SPECIFIC INSTRUCTIONS FROM YOU.

PRINT OR TYPE YOUR NAME AND ADDRESS CLEARLY.

INCLUDE DEFINITE SHIPPING INSTRUCTIONS WITH ALL ORDERS. Please specify whether you wish your package sent by Air Mail; Air Parcel Post; regular mail; Air Express; Air Freight; or Railway Express.

## SHIPMENTS

Selection of the finest and largest plants available in each lot of the crosses included in your order will be made; however, please remember that all crosses do not attain the same size at the same time, therefore do not expect to receive all seedlings of equal size when ordering various crosses. They may or may not be the same and the explanation is simple: all of the tubes are not started at the same time therefore the period of growth varies in each case placing different crosses at an individual stage of development. Furthermore, different parent plants evidence different growing habits which are often reflected in the seedlings produced by these plants. The amount of sun during any one season plays an important part in the growth of plants also so that the seedlings from one cross may even vary somewhat

from one year to another. Be assured that you will receive the best from the lot that you have ordered.

**ALL SHIPMENTS ARE MADE F. O. B. ROSLYN, L. I., NEW YORK** and there is no additional charge made for packing.

## **SHIPPING CHARGES**

All freight and express packages marked for delivery within the boundaries of Continental United States will be sent COLLECT. When prepayment of postage is required, we will advance the necessary charges and a statement will be forwarded to you following shipment. Prompt reimbursement of these charges will be appreciated.

## **INSURANCE**

All packages will be insured to the full value of their contents except when they are to travel by mail. The U. S. Post Office will not accept parcels containing plants for insurance. Our careful attention will be given to adequate insulation, secure wrapping and labeling but further responsibility after the parcel leaves our hands must be assumed by the customer.

## **PAYMENT**

All orders are payable in U. S. Dollars; check, cash, or money order should accompany your order, unless previous arrangements have been made to open a credit account. When cash is used for payment please send registered mail for safe delivery.

**ALL ITEMS LISTED ARE SUBJECT TO PRIOR SALE.**

## **Non-Warranty**

We, Ralph R. Kiesewetter, of Kiesewetter Orchid Gardens, and Joseph W. Urmston, give no warranty, express or implied, as to the productiveness of any of the plants sold and will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of these plants.
